Bug Logs

Credit name: Chapter 6
Assignment Name: Mastery - MetricConversion

```java
public static void InchetoCen () {
    Scanner userinput = new Scanner (System.in);

    System.out.print("Enter your number: ");
    double Inch = userinput.nextDouble();
    double Centimeter = Inch*2.54;
    System.out.print(Inch + " inches equals " + Centimeter + " centimeters.");
}
public static void FeettoCen () {
    Scanner userinput = new Scanner (System.in);

    System.out.print("Enter your number: ");
    double Feet = userinput.nextDouble();
    double Centimeter = Feet*30;
    System.out.print(Feet + " feets equals " + Centimeter + " centimeters.");
}
```
